# Bishop slams GMA picture of economy

**Cites lack  
of jobs,  
heavy debt  
servicing**

By Christine E. Reyes

**INCUMBENT BISHOP**  
Archbishop, who presided over a recent economic summit in his archdiocese of the National Archdiocese (NPA) last week, yesterday put a lesson in economics from a Filipino Catholic bishop.

"The country has been greatly affected by the lack of jobs and heavy debt servicing," said Archbishop Cardinal, who presided over the summit, which was attended by a number of bishops and other church leaders.

"The lack of jobs is a major problem in the country," he said. "The lack of jobs is a major problem in the country." He also mentioned the heavy debt servicing, which is a major problem in the country.

## OFWs fear Filipino casualties in southern Lebanon

By Mike Moran

Many OFWs in Lebanon are worried about the possibility of Filipino casualties in the conflict in southern Lebanon. They are concerned that the conflict will lead to a large number of Filipino casualties.

3-yr terms urged for top brass

By David J. Phillips

THE BOARD OF DIRECTORS of the University of Perpetual Help System - Dalupan (UPHS) has approved a resolution to extend the term of office of its top brass from three to five years.

The board, which was composed of 12 members, met on June 20, 2006, at the UPHS Main Building in Dalupan, Cavite.

The resolution was passed by a majority vote of 10 to 2. The two dissenting votes were cast by the representatives of the faculty and the student body.

UPHS President Dr. Romeo C. Alarcon said that the board's decision was based on the need to ensure the continuity of the university's leadership.

He also said that the board was aware of the concerns of the faculty and the student body.

UPHS Vice President Dr. Romeo C. Alarcon said that the board's decision was based on the need to ensure the continuity of the university's leadership.

He also said that the board was aware of the concerns of the faculty and the student body.

The resolution was passed by a majority vote of 10 to 2.

The two dissenting votes were cast by the representatives of the faculty and the student body.

The board was composed of 12 members, including the President, Vice President, and members of the faculty and the student body.

The board's decision was based on the need to ensure the continuity of the university's leadership.

He also said that the board was aware of the concerns of the faculty and the student body.

# Dubbed movies to blame for poor English?

By Maria Puga

PHOTO BY JIMMY L. LACUNA FOR THE INQUIRER

It is a common observation that the English spoken by many Filipinos is poor. But is it really? Or is it just a matter of exposure?

It is true that many Filipinos do not speak English well. But is it really? Or is it just a matter of exposure?

## Sona shows chinks in GMA armor

By [Name]

When Sona was first introduced to the public, she was a young woman with a bright future ahead of her.

But as she grew older, she became a more complex figure, one who was not always what she seemed.

Now, as she stands before the public, she is a woman who has learned to live with the challenges of fame and fortune.

It is a woman who has learned to live with the challenges of fame and fortune.

It is a woman who has learned to live with the challenges of fame and fortune.

It is a woman who has learned to live with the challenges of fame and fortune.

It is a woman who has learned to live with the challenges of fame and fortune.

It is a woman who has learned to live with the challenges of fame and fortune.

It is a woman who has learned to live with the challenges of fame and fortune.

### OFWs fear Filipino casualties in southern Lebanon

Detailed description of Figure 1: The graph plots the rate of polymerization against the concentration of an inhibitor. The y-axis, 'Rate of polymerization', has major ticks at 0, 0.5, and 1.0. The x-axis, 'Concentration of inhibitor', also has major ticks at 0, 0.5, and 1.0. A smooth, decreasing curve begins at the point (0, 1.0). It passes through approximately (0.2, 0.8), (0.4, 0.65), (0.6, 0.55), and ends at (1.0, 0.5). The curve is concave up, indicating that the rate decreases more rapidly at lower inhibitor concentrations.

**NIH research highlights**

1. The first step is to identify the main topic of the document. This is often found in the title or the first few paragraphs.

Figure 1 is a 3D bar chart titled 'Figure 1: Percentage of respondents by age group and response category'. The vertical axis (y-axis) represents the percentage of respondents, ranging from 0 to 100 in increments of 20. The horizontal axis (x-axis) lists four response categories: 'No', 'Yes', 'Don't know', and 'Refuse to answer'. The depth axis (z-axis) represents age groups: '18-24', '25-34', '35-44', '45-54', '55-64', and '65+'. The bars are color-coded by age group, with the 18-24 group being the lightest and the 65+ group being the darkest. The chart shows that for the 'No' category, the percentage is highest for the 18-24 group and decreases as age increases. For the 'Yes' category, the percentage is highest for the 25-34 group and decreases as age increases. For the 'Don't know' and 'Refuse to answer' categories, the percentages are generally low and relatively stable across age groups.

Age Group	No (%)	Yes (%)	Don't know (%)	Refuse to answer (%)
18-24	~85	~10	~3	~2
25-34	~75	~20	~3	~2
35-44	~65	~30	~3	~2
45-54	~55	~40	~3	~2
55-64	~45	~50	~3	~2
65+	~35	~60	~3	~2

Very good

Figure 1: A schematic diagram of a two-dimensional lattice. It shows a grid of points with arrows indicating interactions between nearest and next-nearest neighbors. Labels include 'J' for nearest-neighbor interaction, 'J2' for next-nearest-neighbor interaction, and 'J3' for a specific next-nearest-neighbor interaction. The diagram is labeled 'Figure 1' at the bottom.

Figure 1: A schematic diagram of a 2D hexagonal lattice. The lattice is composed of solid circles representing atoms. A central atom is labeled 'A'. To its right is an atom labeled 'B'. Above 'A' is an atom labeled 'C'. Below 'A' is an atom labeled 'D'. To the left of 'A' is an atom labeled 'E'. To the right of 'B' is an atom labeled 'F'. The lattice is bounded by a dashed line. The diagram is labeled 'Figure 1' at the bottom.

[illegible]

The diagram illustrates the experimental setup. A subject is seated at a table, looking at a video screen. A camera is positioned above the screen to capture the subject's view. A light source is positioned to the left of the screen to illuminate the scene. The subject is viewing a video screen that displays a target. The camera is positioned above the screen to capture the subject's view. The light source is positioned to the left of the screen to illuminate the scene.

TABLE 1  
Summary of the results of the 1990-1991 survey of the  
status of the fishery for the Atlantic coast of the  
United States. The table shows the number of  
fishermen, the number of boats, and the number of  
trawls used in the fishery. The table also shows  
the number of fish caught and the number of fish  
sold. The table is divided into two sections: the  
first section shows the results for the entire  
fishery, and the second section shows the results  
for each of the five states. The table is  
presented in a tabular format.

Figure 1 is a line graph titled "Percentage of total population in the 15-64 age group, 1970-2000". The Y-axis is labeled "Percentage" and ranges from 0 to 100 in increments of 20. The X-axis is labeled "Year" and ranges from 1970 to 2000 in increments of 10. The graph shows the percentage of the total population in the 15-64 age group for several countries over this period. The United States and Canada maintain the highest percentages, starting around 65% in 1970 and ending around 60% in 2000. China shows a sharp decline from about 60% in 1970 to about 35% in 2000. Other countries like India, Mexico, and the Soviet Union show more moderate declines.

Country	1970 (%)	1980 (%)	1990 (%)	2000 (%)
United States	65	63	61	60
Canada	65	63	61	60
China	60	50	40	35
India	55	50	45	40
Mexico	50	45	40	35
Soviet Union	45	40	35	30
Other	40	35	30	25

## 2 Ecija bishops oppose STL opening

Two bishops of the Ecija diocese have expressed their opposition to the opening of the new STL (St. Lawrence Theological Institute) in Ecija, Cebu. Bishop Jose S. Reyes, Jr. and Bishop Romeo A. Alonzo, in a joint statement, said that the opening of the STL is a "step towards the secularization of the Church." They also expressed their concern over the "quality of education" that the STL will provide. The STL is a new theological institute that is being opened by the Ecija diocese. It is located in Ecija, Cebu, and is expected to start its classes in the coming year. The STL is a response to the growing demand for theological education in the Ecija diocese. However, the two bishops believe that the STL is not a good idea. They believe that the STL will lead to the secularization of the Church, which is a major concern for them. They also believe that the STL will not provide a quality education. They believe that the STL is a step towards the secularization of the Church, which is a major concern for them. They also believe that the STL will not provide a quality education.

## 2 Army soldiers killed in NPA ambush in Quezon

Two Philippine Army soldiers were killed in an ambush by the New People's Army (NPA) in Quezon province. The incident occurred on July 10, 2010, in the town of San Mateo. The two soldiers were part of a patrol that was ambushed by a group of NPA fighters. The NPA fighters opened fire on the soldiers, and two of them were killed. The incident is the latest in a series of attacks by the NPA in Quezon province. The NPA has been active in the province for many years, and has been responsible for several attacks on military and civilian targets. The Philippine Army is currently conducting operations to clear the NPA from the province. The army has been successful in clearing several areas, but the NPA remains active in other parts of the province.

## Education: Cebuans want English spoken in business schools to lure call centers

A survey conducted in Cebu has found that many Cebuans want English to be spoken in business schools to attract call centers. The survey was conducted by a group of researchers from the University of Cebu. They found that 75% of the respondents wanted English to be spoken in business schools. This is a significant finding, as it shows that Cebuans are interested in attracting call centers to the island. Call centers are a major source of employment in Cebu, and many Cebuans want to attract more call centers to the island. One way to attract call centers is by having English spoken in business schools. This would make it easier for call centers to find qualified employees. The researchers believe that this is a good idea, and they recommend that business schools in Cebu should start offering English instruction. This would help to attract call centers to the island, and it would also help to improve the quality of education in business schools.

## Probe of mining canons ordered

The Department of Environment and Natural Resources (DENR) has ordered a probe into the mining canons in the Philippines. The DENR is concerned that the mining canons are outdated and do not reflect the current state of the environment. The DENR wants to ensure that the mining canons are up-to-date and reflect the latest scientific research. The DENR has ordered a probe into the mining canons, and it wants to know what changes need to be made. The DENR is currently conducting a study of the mining canons, and it wants to know what changes need to be made. The DENR is currently conducting a study of the mining canons, and it wants to know what changes need to be made. The DENR is currently conducting a study of the mining canons, and it wants to know what changes need to be made.

# Income tax take up 14% in first 6 months

By Nicholas D. Smith

**P's B**  
collection still short of target

The Internal Revenue Service reported today that it had collected 14 percent more in income taxes in the first six months of this year than in the same period last year. But the agency also said that it was still far from meeting its target of collecting 20 percent more.

The IRS said that it had collected \$110 billion in income taxes in the first six months of this year, compared with \$98 billion in the same period last year. The agency's target was to collect \$120 billion, or 20 percent more than last year.

The IRS said that the increase in income tax collections was due to a number of factors, including a rise in the number of people who are working full-time, a rise in the number of people who are married, and a rise in the number of people who are claiming the earned income tax credit.

The IRS also said that it was still far from meeting its target of collecting 20 percent more in income taxes. The agency said that it needed to collect an additional \$10 billion in income taxes to meet its target.

### BIR's way to catch tax evaders

the frequency of use.

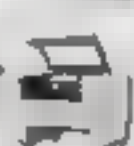

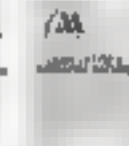

Figure 1 illustrates the effect of salt-and-pepper noise on a handwritten digit '4' and the results of different denoising techniques. The images are arranged in a 4x4 grid. The first row shows the original image and three levels of noise. The second row shows the image after median filtering, which removes most of the noise. The third row shows the image after median filtering followed by a 3x3 pixel averaging operation, which results in a blurred image. The fourth row shows the image after median filtering followed by a 5x5 pixel averaging operation, which results in a very blurred image. The images are labeled with their respective processing steps: 'Original', 'Noise', 'Median', 'Median + 3x3', 'Median + 5x5', etc.

# Eddie Garcia, ageless icon

**By Mark Adams**

**I**n the 1960s, Eddie Garcia was the most popular actor in the Philippines. He was a handsome, charming actor who played the role of the romantic hero. He was also a successful businessman and a philanthropist. He was a true icon of the Philippine entertainment industry.

Garcia was born on August 10, 1934, in Manila, Philippines. He was the son of a wealthy family. He was educated at the University of the Philippines. He was a member of the Phi Kappa Phi Honor Society. He was also a member of the National Academy of Arts and Letters.

Garcia's career began in the 1950s. He was discovered by a talent scout who saw him in a local television commercial. He was signed to a contract with a major studio. He made his debut in a film in 1956. He was a huge success. He became a household name. He was the most popular actor in the Philippines. He was also a successful businessman. He owned a chain of restaurants. He was also a philanthropist. He donated money to various charities. He was a true icon of the Philippine entertainment industry.

## A survey of heritage charters

**T**he National Historical Commission (NHC) has issued a survey of heritage charters across the country. The survey aims to identify and document the historical and cultural significance of various sites and structures.

The survey is part of a larger initiative to preserve and promote the country's rich heritage. It involves a thorough examination of historical records, maps, and other documents to determine the value of various sites.

The NHC has identified several key areas for focus, including historical landmarks, archaeological sites, and traditional architecture. The survey results will be used to develop a comprehensive heritage charter.

The survey is ongoing, and the NHC is encouraging the public to provide information and insights into local heritage sites. The final charter will serve as a guide for the protection and management of these sites.

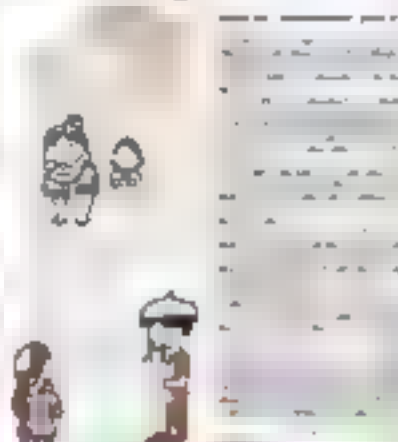

The survey is a collaborative effort involving the NHC, local government units, and the community. It is a crucial step in ensuring that the country's heritage is preserved for future generations.

The survey is a comprehensive study that covers a wide range of historical and cultural aspects. It is a testament to the country's commitment to preserving its heritage.

The survey is a significant milestone in the country's heritage preservation efforts. It is a step towards a more informed and responsible approach to managing historical resources.

The survey is a testament to the country's rich and diverse heritage. It is a reflection of the country's commitment to preserving its history and culture.

The survey is a crucial part of the country's heritage preservation strategy. It is a step towards a more sustainable and inclusive approach to managing historical resources.

400

Figure 1 illustrates the experimental setup for measuring the time delay of a quantum state. The setup involves a sequence of operations: a Hadamard gate (H), followed by a controlled operation (C) with a time delay (t), and another Hadamard gate (H). The input is a state  $|\psi\rangle$ , and the output is a state  $|\phi\rangle$ .

## Beauties and the Beast

#### 4. Conclusions

The image is a very poor quality scan of a document. It is extremely blurry and low-resolution. In the top left corner, there is a large, bold letter 'R'. Below it, there are several lines of text that are mostly illegible. In the center of the page, there is a large, rectangular area that appears to be a table or a complex graphic, but it is completely unreadable. To the right of this central area, there are more lines of text, also illegible. At the bottom of the page, there is a line of text that might be a footer or a page number, but it is not clear. The overall appearance is that of a very old or very poorly scanned document.
